my purpose

Since I was a child, I have been active as a Japanese language and human resource development instructor for Nepali youth in many programs designed to promote world peace and prosperity. We know that the world is in turmoil due to the rapid and slow growth of human consciousness. I'm 51 years old now, but when I was in elementary school and when I turned 25, my dream was to become a Nepali politician and make Nepal a better country. Fortunately, I was able to go to Japan when I was 20 years old. My Japanese colleagues and seniors from those days are active in Japan's political world, bureaucracy, and small and medium-sized enterprises. I was concerned that there might be a misunderstanding of the philosophy due to the different cultures and communication between Nepal and the foreign country, or that the Nepalese side might not be accurately conveying the situation in the foreign country. The world has become globalized and it seems that we are not disseminating information to the general public about the realization of the SDGs. I would like to provide guidance to Nepali youth as a program coordinator to help Nepali youth find employment in healthy companies in Japan and the international community.

my ideal

1. I want to promote education so that all Nepalese can build a harmonious family environment and live happily in their home country.
2. We will reveal our humanity, absorb the world's cultures, and strive to improve lives.
3. I want humans to love each other instead of fighting and contribute to world peace and prosperity.
4. We would like to promote safety education for Nepali craftsmen in order to improve the quality of Nepal's traditional occupations and industries.
5. While developing, teaching materials are required to improve human knowledge, we would like to spread education that unifies the way of thinking and values of Nepali people. We would love for your company to hold a seminar for young Nepali people who have dreams of going to Japan to study or find employment. Please consider this.
